## CAREER OBJECTIVE

- A learner who wants to acquire a position that provides the opportunity to bring my technical and problem solving skills to make the organization successful.

## PROJECTS

- **InExpendible** - The website, which was made with Django Framework, shows users the stats for their expenses and income using interactive charts.
- **Music Recommender using Python** - The project works on the Decision Tree Classifier Algorithm and predicts what genre of song the user might like.
- **Word Cloud** - This project was a part of a python course in Coursera. It generates a word-cloud based on the frequency of each word in the file.
- **Automation using python** - It processes data in excel sheet and performs operations on thousands of cells in just a few seconds.
- **E-Banking Website** - This project was a group project which shows the basic working of an e-banking website.
- **World Time App** - The app was made using Flutter. It shows the time of different places in the world.
